

2022-2023 Safe Learning Plan

MITIGATION PROTOCOL

Masking

1. Masks will continue to be recommended but not required with the exception of the additions listed under item number 5.
2. There is not a current mask mandate requirement from the state of Minnesota. While no longer required by law, guidance from the Centers for Disease Control (CDC) and the Minnesota Department of Health are recommending the wearing of face masks indoors in public settings and when around people from other households.
3. While no longer **required** by law, CDC continues to recommend people wear a **mask** in indoor areas of public **transportation**.

Department of Education, Minnesota Department of Health, local health officials, and our local COVID Team.

4. A supply of masks will be available for students, staff, and visitors in need.
5. Masks will be **required** for students and staff under the following circumstances.
 - a. Students and staff returning from shortened isolation after testing positive for COVID-19 will be required to wear a mask on days 6-10.
 - b. Students and staff returning from shortened quarantine from household contact and are unvaccinated will be required to wear a mask on days 6-10.

Physical Distancing: Physical distancing will take place to the greatest extent possible.

Health Screening Process: If you're sick, stay home. All people entering CPA facilities are expected to perform a self-health screening prior to entering the building (screening for elementary children must be completed by an adult).

What to Do... Not Feeling Well

1. Students and staff that are not feeling well should stay home.
2. Students and staff will be sent home if they have a fever of 100.4 degrees or higher; new onset cough or a cough that gets worse; has difficulty/hard time breathing; new loss of taste or smell. They will be required to test for COVID-19 or have an alternative diagnosis from a medical provider to return or stay home for 10 days from symptom onset.

Communication: Families are REQUIRED to report a positive case of COVID-19 to the COVID-19 Coordinator/Administrator and their building principal. Julie Lopez (School Nurse) and/or Tim McGowan (Executive Director) are the Covid-19 Coordinators.

What to Do... Positive Test

Criteria for 5-Day Isolation Period

A person can end isolation after 5 full days since the onset of symptoms or the positive COVID-19 test date (if asymptomatic) if:

1. Fever-free for 24 hours (without the use of fever-reducing medication)
2. Symptoms have subsided.
3. Wear a well-fitted mask from days 6-10.

**Please note, the current Minnesota State High School League policy is that a student can't compete in a competition until after a 10-day COVID-19 isolation period. A student may practice after a 5-day COVID-19 isolation period if able to wear a well-fitted mask and all other criteria are met.

If a person doesn't meet all three criteria listed above, they must continue to isolate themselves for up to 10 days. Encouraged to have a negative rapid test prior to returning to school.

Quarantine

Quarantines will continue to be required for household contacts unless the individual is vaccinated. Household contacts that have been able to separate at home may return on day 6, from last exposure, as long as they wear a well-fitting mask for days 6-10, as noted in the masking section. Students and staff not willing or able to wear a well-fitting mask will be required to quarantine for 10 days from last exposure.

• **Close Contacts and Quarantine:** High School and Middle School

- Due to the frequency of student transitions to different classrooms throughout the day at the High School and Middle School, CPA grades 5-12 will no longer perform contact tracing following a positive case.
- It is best and safest practice for parents to monitor for symptoms at all times, regardless of potential exposure.
- Children who are ill will continue to be sent home and we will work collaboratively with the parents of a sick child on a safe return to school.

Quarantine:

Quarantines will continue to be required for household contacts unless the individual is vaccinated. Household contacts that have been able to separate at home may return on day 6, from last exposure, as long as they wear a well-fitting mask for days 6-10, as noted in the masking section. Students and staff not willing or able to wear a well-fitting mask will be required to quarantine for 10 days from last exposure.

Other Mitigation Strategies: CPA will also implement hand hygiene practices, cleaning and disinfecting protocols, and enhanced indoor air ventilation to prevent the spread of COVID-19.

Vaccinations for School Age Students: Students age 3 and older are currently eligible for the Pfizer BioNTech COVID-19 vaccine. Community sites continue to offer vaccinations to students age 12 and up. The [State of](#)

[Minnesota Vaccine Locator](#) tool allows searching by zip code, distance, age group, and more.

Student and Staff COVID-19 Testing: Minnesota and Vault Medical Services have teamed up to offer no-barrier, at-home COVID-19 saliva testing for everyone who lives in Minnesota, with or without symptoms. You can read more about this service on the [Minnesota Department of Health website](#).

Coordination with state and local health officials: CPA School staff will continue to collaborate with officials from the Ramsey County Public Health and the Minnesota Department of Health.

Visitors During the School Day: Visitors will be allowed in the building for educational purposes only with prior principal approval.

Parent Drop Off/Pick Up: To help ensure the safety and security of students, parents are asked:

1. **Drop Off** students at Door B on DeSoto
2. **Pick Up** students at Door A on Magnolia after buses have left the premises (approximately 2:50 pm).
